

A state-of-the-art **Clinical Trials Management System (CTMS)** that improves the ease, quality and efficiency of conducting research for sites.

SignalPath by Verily is now [Verily Viewpoint Site CTMS](#).

The screenshot displays the Verily Viewpoint Site CTMS interface. At the top, there are three treatment cards: 'Baseline' (01-Feb-2022), 'Treatment 1' (05-Feb-2022 at 12:00 PM), and 'Treatment 2' (07-Feb-2022 - 13-Feb-2022). The 'Treatment 1' card is highlighted with a green checkmark. Below this, a detailed view of 'Treatment 1' is shown, including options to 'Edit decision', 'Add event', and 'Add visit'. The main view shows the date '05-Feb-2022 at 12:00pm' and fields for 'Target day', 'Visit window', 'Location', 'Investigator', and 'Research coordinator'. A '75%' progress indicator is shown in a green circle. Below this is an 'Activities' table with columns for Activity, Status, Date, and Physician. The table contains three rows, each with a green checkmark in the Status column.

Activity	Status	Date	Physician

Empower optimal performance

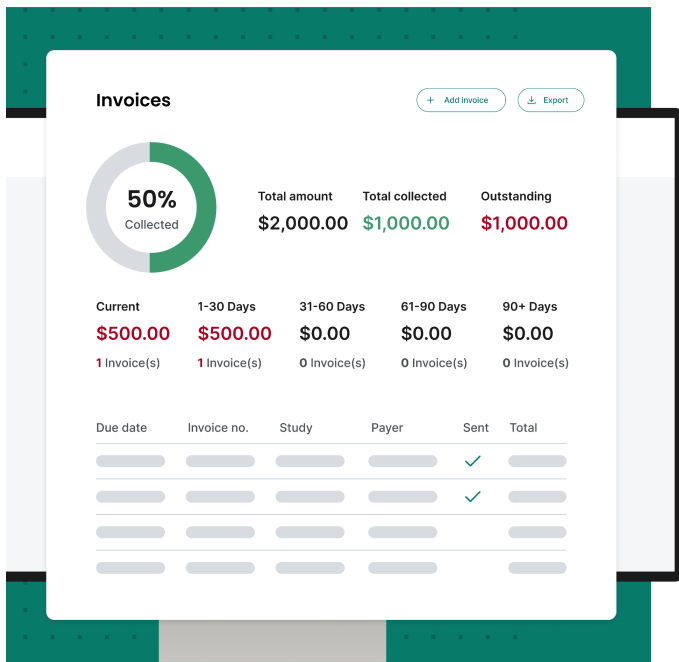

Experience a better way to protocol

Let [Verily Viewpoint Site CTMS](#) tech and teams ingest, translate and configure PDF protocols through a proprietary protocol digitization feature, easily powering study workflows and unburdening your staff.

Invest in usability

At Verily, user experience is everything. To that end, Site CTMS was designed by researchers, for researchers to be easy to use by all study stakeholders.

Maximize research revenue

Streamline your pre-award process

Pre-award tools optimize billing calendar creation, budget preparations and study negotiations (including Medicare Coverage Analysis).

Enhance site profitability and optimize research cash flows

Post-award tools enable real-time account reconciliation, milestone tracking, invoicing and financial reporting.

Integrate and unify solutions

Leverage existing investments in eClinical technologies

Site CTMS offers multiple integrations across the eClinical ecosystem, including:

- Health system EHRs
- eRegulatory binders
- Patient payments
- IRB and more.
